

# HOT-TAP ACCESSORIES

FOR 5250 & 5450 SERIES FLOWMETERS

- Full Blocking Kits
- Blocking Top Kits
- Removal Harnesses
- Top Assemblies

## FULL BLOCKING KITS

These kits are designed to allow users to safely remove the top assembly, while under pressure, from an existing installation and have everything else needed to reinstall it elsewhere. Additionally, it includes the parts necessary to fully seal up the existing installation.

Part Numbers:

5250-XXX-BKFULL  
5450-XXX-BKFULL

Contents:

Blocking top  
Size-specific removal harness  
Size-specific base assembly  
Slider plate  
Drill guide  
Various tools & accessories

## BLOCKING TOP KITS

These kits allow for safe removal of a top assembly, while under pressure, and a blocking top to seal the holes while it is removed.

Part Numbers:

5250-XXX-BKTOP  
5450-XXX-BKTOP

Contents:

Blocking top  
Size-specific removal harness

## TOP ASSEMBLIES

Made up of the electronic enclosure, probes and mounting fixture, the top assembly is what senses and displays flow. These replacement assemblies can be ordered if one were to be damaged or if an additional one is needed after a Full Blocking Kit is used for a second installation.

Part Numbers:

5250-XXX-TOP  
5450-XXX-TOP

Contents:

Size-specific top assembly  
Size-specific removal harness

## REMOVAL HARNESES

This is a size-specific cable that attaches to the hot-tap meter and allows the top assembly to be removed, while under pressure, from an existing installation so it can be swapped out with another top assembly.

Part Numbers:

5250-XXX-CBL  
5450-XXX-CBL

Contents:

Size-specific removal harness
